

# KICKSTART PROJECT

The Kickstart Project also has a separate Quad section and this is aimed at young people **12** years and over, who are experiencing disruption in their lives. We have several Quad Bikes for young people to use and these are particularly suitable for young people who may not be able, through age or disability, to participate on the Trials Motorbikes.

The Project has an Artic Cat 400cc Quad that has a second seat. This would be suitable for young people who are **not** able to manage a Quad or Trails Motorbike themselves, but will be able to experience the thrills of this form of motor sport.

Young people participating must sign the same **contract** as the Trials Bikers and **parental consent** for Emergency Treatment is also required.
