

# NEW HOUSING LAND ALLOCATIONS

## A5 APPENDIX

## Appendix 5 New Housing Land Allocations

Table 1 provides an overview of all new sites that contribute to the Strategic Development Plan's "housing allowances" (as identified in Schedule 1 of the Strategic Development Plan). The table also identifies the effective housing land supply at 1 January 2011, along with "windfall" sites that have been added to the effective housing land supply since 2011. Windfall sites are previously unallocated sites that have received planning permission for housing development, and which have subsequently been identified within the Housing Land Audit.

The remaining tables show the new allocations being made through this plan for each administrative area of Aberdeenshire. They also identify existing housing allocations that are being carried forward from the previous plan and other committed housing sites.

The settlement statements in appendix 8 also provide details of the full housing provision for each of the identified towns and villages within Aberdeenshire.

\*Unallocated sites added to the effective housing land supply in the Housing Land Audit since January 2012

The strategic plan sets out a target for the amount of housing that is required up to 2026 and beyond for the Aberdeen and Rural Housing Market Area. Providing land to enable this target falls to this plan and to the City of Aberdeen Local Development Plan. The tables below indicate the current land supply position (as of 2016) for each housing market area to show how a generous supply of land to meet the target is provided. Delivery of housing on the land allocated through this local development plan will play an important role in meeting this target. The council will work through its action programme and with developers and service providers to enable this target to be met. The land supply will be monitored and the council aims to provide for a minimum of 5 years of effective housing land at all times.
