

Ellon Community Council

Aqib Pervaiz

I've been in Ellon for more than 5 years now and believe that young people in Ellon such as me and my peers deserve an opportunity to have a say.

We all have different opinions and a voice of reason as after all, **we are the future!**

I believe that **together** we can fight issues that affect us and our town by working hard and listening to each other's opinions. I feel that I would be a good candidate as I want to contribute as much as I can and I am also determinedly committed to **equality & opportunities** – my non-profit project "Minus Borders" is proof of this. Personally, I feel that we need to work on the issues such minimising bullying and prejudice better recognition of achievements and making sure that people are happy in school.

Together, we can provide a positive image of young people and prove that we are something!

I'm doing my part, it is now **your** opportunity to elect a candidate who is **passionate** about getting involved!
