Introduction

- Baxter Design, on behalf of our client Mr & Mrs Philip Baxter, submit the following Development Bid in support of land being allocated for residential use at Mavisbank, Old Deer, Peterhead
- The purpose of this statement is to set out the planning justification for the identification of the land in question as being suitable for future residential development and inclusion in the new Aberdeenshire Local Development Plan

Location

Old Deer is situated 7 miles east of Peterhead and 25 miles from Aberdeen City Centre on the A952 main road.

Figure 1. Location plan

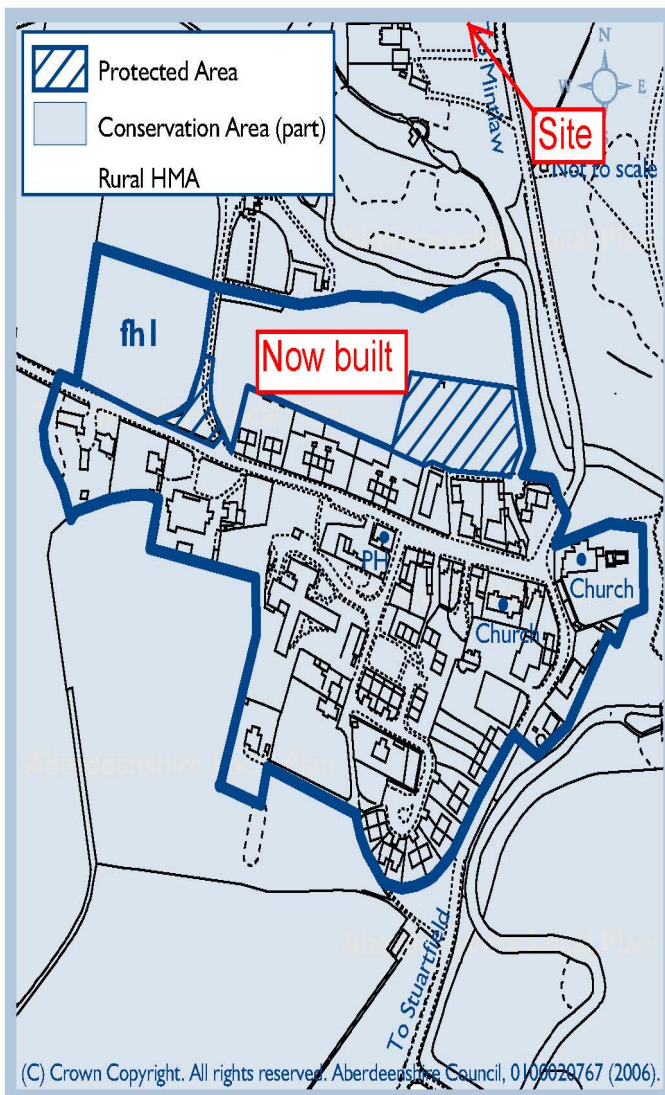

The Mavisbank site is located at the northern side of Old Deer, off the B9030. The site is in single ownership and comprises a field currently used for the grazing of Highland cattle. The site subject of the development bid is identified in figure 2 below.

Figure 2: Site Plan

Extract from Local Plan.

Old Deer

In Old Deer there is one main opportunity for new development.

- **Site ch I** is suitable for around 25 houses.

Future housing land is shown as **site fh I** (10).

The Conservation Area extends beyond the area of the map: refer to the Council's Planning and Environmental Services for details.

Design Statement

Mavisbank, Old Deer

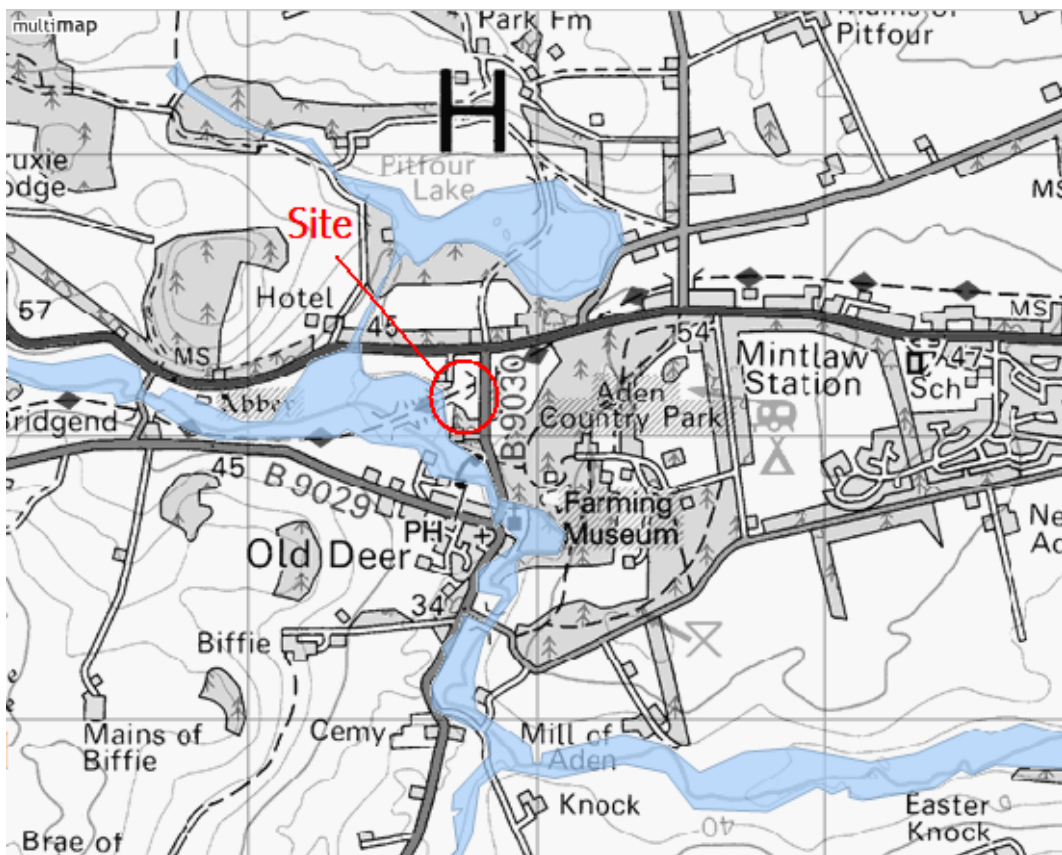

It is our intention to promote a piece of land which is situated to the north of Old Deer, directly across from The Aden Country Park. The development would serve approximately 6 eco-friendly one-off dwelling houses incorporating business spaces. We would propose that all housing should be of high specification insulation (see appendix). We would also stipulate that the developer would require to incorporate a level of sustainability of materials chosen for construction i.e. to source locally produced and supplied stone/timber/materials etc from verified sustainable sources. We have also shown access links to the Buchan and Formartine way which forms the north boundary to the site as well as the formation of a public walkway along the edge of the B9030 to the village of Old Deer.

Figure 4. Masterplan

We enclose an extract from the SEPA 1: 200 year storm flood maps. As can be seen from this the site is not subject to flooding. See figure 5 below.
