Site Assessment for Sustainable Siting and Design**

- A3 The sustainability of this site is enhanced by the minimal infrastructure provision needed to service it. All 6No houses can be served by the existing road, foul sewer and water provisions located on Woodland Gardens.

The housing units have sites large enough to accommodate geo thermal heating .

The proposed houses would be of contemporary design with the larger areas of glass oriented to take advantage of solar gain. They would also endeavour to maximise on the use of sustainable technologies and would have high levels of thermal insulation to minimise energy consumption.
