Development of the land would provide housing and employment opportunities within a community where demand currently exceeds supply.

It would further enable the provision of the new southern "bypass" as identified in the Capacity Study to the benefit of all road users.

Community benefits may be material, such as community facilities, or intangible, such as affordable housing or the ability to live locally. Traffic Impact Assessment	Yes <input type="checkbox"/>	No <input checked="" type="checkbox"/>	NA <input type="checkbox"/>

Rather than full studies it may be appropriate to undertake initial assessments to identify the scale of any works that might be required, as this will impact on the deliverability of the proposal. This assessment may be no more than an exchange of letters with appropriate agencies. Information on water and sewage capacity is available online at : http://www.scottishwater.co.uk/portal/page/portal/SWE_PGP_CONNECTIONS/SWE_CORP_CONNECTIONS/ASSET_CAPACITY_SE ARCH

C6 What are the access arrangements you propose for the site. Does your site plan clearly show where you propose to access the road network? Yes No

Other information

O1 What other information would you like to be considered in support of your proposal? In order to comply with the Data Protection Act 1998 please do not include any personal information

This development bid should be considered in conjunction with that submitted on behalf of Westhill Development (Arnhall) Co Ltd for the land to the north. It immediately abuts the land which is the subject of that bid and would be a natural progression of development southwards.

Development of this land would have minimal landscape and visual impacts and this is confirmed by its inclusion, as an area "most suitable" for development, within the Westhill Capacity Study. This was an independent study commissioned by Aberdeenshire Council using a goal achievement matrix devised by the Council to assess each site. Accordingly significant weight should be attached to it in identifying land for development.

Development of the land would also secure the provision of the southern bypass through the area as identified by the Capacity Study. This would significantly improve traffic flows in the area to the benefit of the wider community.
