Effect on the community

Q1

Has there been any opportunity for local people to influence what you propose through local engagement? Yes
No
Not Yet

If you have undertaken any community consultation please provide details of the ways in which engagement was conducted, its effectiveness and the way in which it has influenced your proposals. Please provide details of any engagement you may propose to undertake.

C2

At least 25% of all housing is likely to be required to be affordable. If applicable, are you considering providing more or less than this? More
25% or Less

C3

What community benefits arise from your proposals? What would the nature of these be, and how would they be delivered?

The proposal will provide a housing development which will be at least 50% affordable in tenure and it will therefore ease pressure on the affordable housing waiting list for the. Insch area. It will also enable people to live locally who might not be able to do so in the private market. We would anticipate that some special needs accommodation might be provided within the final design for the scheme. This would be subject to discussions with the local authority and the NHS on what the local needs are.

Community benefits may be material, such as community facilities, or intangible, such as affordable housing or the ability to live locally. Include elements which you anticipate may be required as developer contributions from the development (although specifics will have to be negotiated with the Council on the basis of the development proposed)
