### Footnotes:

1 Area is on Census day 29 April 2001.

2 'Number of students away from home' is the number of students and schoolchildren in full-time education who would reside in the area were they not living away from home in term-time. Data for the number of students away from home was not available from the 1991 Census.

3 'Daytime' population is calculated by subtracting those living in the area but working or studying outside the area, and adding those living outside the area but working or studying inside the area, to the resident population.

4 Care must be taken when interpreting the intercensal population change, as there have been changes in definition between 1991 and 2001, and there is a small element of under-enumeration in the 1991 counts, the 2001 counts have been adjusted to account for under-enumeration.
